

CENTER OF EXCELLENCE WORKSHOP: AESTHETIC BREAST SURGERY WITH ANATOMICAL IMPLANTS

Date: October 18-19, 2014
Location: Metropolitan Hospital, Athens, Greece

OVERVIEW

This two-day, hands-on training features live surgeries and in-depth instruction in CPG implants, and fat grafting techniques for face and body. The course is targeted towards younger surgeons and/or those interested to move from round to anatomical implants and learn more about facial fat grafting to create volume and improve contours. The course is limited in participant capacity to allow for a memorable educational experience in a comfortable atmosphere.

ABOUT THE CENTER OF EXCELLENCE

Metropolitan Hospital was founded in 2001 as part of the PERSEUS Healthcare Group SA, and in a short time firmly established itself in the private healthcare sector. The vision of its founders aimed to make Metropolitan Hospital a model health care facility based upon the premise that the provision of high quality health services is not a luxury, but a need for each patient. The result surpassed its founders' expectations. With high end facilities, advanced technological equipment and top quality medical and scientific staff, the hospital has demonstrated high levels of achievement in medical research, the implementation of pioneering diagnosis and treatment methods, and the provision of substantial services which can meet the requirements of every individual and their healthcare needs.
