

Center of Excellence Workshop

Aesthetic Breast Surgery with Anatomical Implants & Facial Fat Grafting

Overview

This two-day, hands-on training features live surgeries and in-depth instruction in CPG implants and fat grafting techniques for face. The course is targeted towards younger surgeons and/or those interested to discover the benefits and proper usage of anatomical implants, and facial fat grafting to create volume and improve contours. The course is limited in participant capacity to allow for a memorable educational experience in a comfortable atmosphere.

Date: May 23rd-24th, 2015

Location: Athens, Greece

About the Center of Excellence

Metropolitan Hospital was founded in 2001 as part of the PERSEUS Healthcare Group SA, and has firmly established itself in the private healthcare sector. Its founders aimed to make Metropolitan Hospital a model health care facility based upon the premise that high quality health services are not a luxury, but a need for patients. With high-end facilities, advanced technological equipment and top quality medical and scientific staff, the hospital has demonstrated high levels of achievement in medical research and the implementation of pioneering diagnosis and treatment methods, which have far surpassed industry standards.
